

UJJWAL SINGH

Full Stack Web Developer

✉ sujawal85@gmail.com ☎ +91-8090089967 📍 Lucknow, India 🔗 [Portfolio](#) [LinkedIn](#)
🐙 [GitHub](#)

CAREER OBJECTIVE

Analytical and detail-oriented aspiring Full Stack Web Developer proficient in the MERN stack (MongoDB, Express.js, React.js, Node.js). Capable of writing production-ready code for both front-end and back-end development to build single-page applications. Passionate about coding and strongly interested in working in a product-based company as a Full Stack Developer.

EXPERIENCE

Software Engineer

09/2025 – Present | Noida

Subtlelabs

Backend (Django)

- Developed backend services in **Django** to process and manage data from third-party POS platforms such as **Shopify, Lightspeed, Shyfter, and Shipday**.
- Integrated multiple **third-party APIs** and mapped external POS data to internal Django data models.
- Implemented **role-based authentication and authorization** for secure access control.

Frontend

- Built interactive dashboards using **AG Grid** for dynamic tabular data.
- Implemented **AG Charts** to visualize operational and analytics data.

Mobile Development

- Currently developing a **cross-platform mobile application using React Native for iOS and Android**.
- Building a **job portal and workforce management platform** with features like authentication, job listings, and user profiles.
- Worked with **Android Studio** and **Xcode** for building, testing, and running the mobile application on both platforms.

Tech Stacks: Django, Python, React.js, React Native, JavaScript, REST APIs, AG Grid, AG Charts, Shopify API, Lightspeed API, Shyfter API, Shipday API, Role-Based Authentication, Android Studio, Xcode.

Software Engineer

02/2025 – 09/2025 | Noida

Wisdom Tree Ventures

- Developed and maintained scalable front-end components using **JavaScript, TypeScript, Tailwind CSS, and Next.js**, improving overall application performance and reducing execution time by **40%**.
- Implemented **real-time order tracking and status updates** using WebSockets, enhancing responsiveness and reliability for both users and admin panels in a quick commerce environment.
- Designed and optimized **Dine-in and in-app Chat modules**, enabling seamless restaurant interactions and real-time customer support, leading to improved order accuracy and user satisfaction.
- Built a **Party Booking feature** allowing users to select venues, manage guest lists, and customize menu items, enhancing user engagement and booking efficiency.
- Developed **Parcel and Ride Booking modules** (similar to Rapido), enabling users to book rides and track deliveries in real-time. Integrated **Google Maps APIs** for live location tracking of food delivery, parcels, and rides.

Tech Stacks: TypeScript, JavaScript, Next.js, Tailwind CSS, React Context API, WebSockets, Google Maps API, Postman

Product Engineer (Full Stack)

06/2023 – 02/2025 | Remote

Advenio TecnoSys Private Limited

- Working as a **Senior Developer**, leading both **front-end and back-end development** for control panel and client dashboard applications, managing feature implementation, product builds, and deployments.
- Developed and maintained scalable web applications using **JavaScript, React.js, Node.js, and Material UI**, ensuring high performance and responsive user experiences.
- Designed and deployed **serverless APIs using Node.js on AWS Lambda (via Claudia.js)**, improving system scalability, performance, and cost efficiency.
- Leveraged **AWS services** including:
- **S3** for secure data storage

- **EC2** for hosting front-end and back-end applications
- **CloudWatch** for monitoring and logging Lambda functions
- Implemented deployment workflows by syncing local builds to EC2 instances using external tools (e.g., WinSCP) and managing processes with **PM2** to ensure zero-downtime deployments.
- Led and mentored interns, guiding them through development tasks and ensuring successful contributions to production releases.

Tech Stacks: React.js, Redux, JavaScript, Node.js, Express.js, Material UI, MariaDB, AWS (Lambda, S3, EC2, CloudWatch), PM2, Postman

EDUCATION

Full Stack Web Development, Full Time

2022 – 2023 | Remote

Masai School, Bangalore

Bachelor of Science, Electronics (Hons.), Full Time

2019 – 2022 | Delhi University, India

Delhi University, India

CGPA: 7.80/10

SKILLS

Technical Skills

Languages: JavaScript, TypeScript, SQL

Frontend: React.js, React Native, Next.js, Tailwind CSS, Material UI

Backend: Node.js, Express.js

State Management: Redux Toolkit, Context API

Databases: MongoDB, MariaDB (SQL & NoSQL)

Cloud & DevOps: AWS (S3, EC2, Lambda, CloudWatch), CI/CD, PM2

APIs & Architecture: REST APIs, Microservices (basic), WebSockets

Tools & Others: Git, Postman, JWT Authentication

Core Concepts: Data Structures & Algorithms, Performance Optimization

Additional: Python (Basics)

Tools

Development: VS Code, Xcode, Android Studio

Version Control: Git, GitHub

API & Testing: Postman, Swagger, Jest, Cypress

Package Management: npm, Yarn

Cloud & Deployment: AWS (Lambda, EC2, S3, CloudWatch)

Soft Skills

Team Work, Remote Work, Problem Solving, Multi-tasking
